Subject: Notice of New Water Main Installation on Graham Avenue and Connection Availability

Dear Homeowner:

The Manchester Utilities Authority (MUA) is installing new water mains on Graham Avenue and Squaw Brook Road, and a new water service connection for the Holland Christian Homes. Construction along Graham Avenue is anticipated to begin Monday, March 16, 2026, and will continue for approximately two weeks.

This water main extension will allow homeowners with new water mains in front of their properties to connect to the MUA public water system and decommission their private well. The homeowner is not required to connect to the MUA public water system. During the water main construction along Graham Avenue, homeowners will have the opportunity to have a water service connection made to the MUA public water system, with the connection to the home completed by the homeowner, either as part of this current project or in the future. Specifically, the MUA will be installing a new water main, curb box, and meter box along Graham Avenue proceeding East from the entrance of the Holland Christian Home to Squaw Brook Road.

The MUA seeks to coordinate with Graham Avenue homeowners regarding the preferred location of the service line from the main to the new curb box within the public right-of-way. Because these components have not yet been installed, your input will help us ensure they are placed in a location that will allow for easy connection to your home in the future. When selecting the connection point where your home may eventually connect, we recommend aligning it near your existing well line to avoid entering your basement.

An Arcadis representative is available to meet with you on-site to discuss preferred connection locations. If you wish to move forward with connecting now, please contact Denise Wahad via email at [info@muawater.net](mailto:info@muawater.net) or 973-942-9027 ext. 3 to obtain the New Water Connection Application and further instructions.
